DRAIN VALVE

221-23-04 - 1/2 Male Solder x Male Hose

- A great solution for boiler drains on hydronic systems. It saves at least one solder joint and provides a much cleaner installation.
- Typically these branch off 1" or 1-1/4" copper lines, so they can soldered directly into a 1" x 1" x 1/2" tee.
- Also available with:
 - Tamper-resistant screwdriver or Loose Key operation
 - Cap & chain

DRAIN VALVE

121-23-04 - 1/2 Male Solder x Male Hose

- A great solution for boiler drains on hydronic systems. It saves at least one solder joint and provides a much cleaner installation.
- Typically these branch off 1" or 1-1/4" copper lines, so they can soldered directly into a 1" x 1" x 1/2" tee.
- Also available with:
 - Tamper-resistant screwdriver or Loose Key operation
 - Cap & chain

VENT CAP

2324 - Vent Cap with 1/8 FIP tapping and heavy duty EPDM gasket

- The Dahl Vent Cap installs onto a boiler drain and the 1/8" FIP tapping receives an automatic air vent, making system or device service a breeze.
- Isolate the air vent for service with a quick quarter turn or remove the entire assembly when it is more desirable to use a hose for draining or filling the system.

DRAIN OR VENT VALVE

222-60-04 - 1/8 MIP x Male Hose with screwdriver operation

- A perfect alternative to baseboard and radiator air vent valves, these allow you to attach a washer or garden hose and run it to a bucket so there's no mess.
- The tamper proof screwdriver operation minimizes accidental opening by kids, etc.
- Screwdriver operation also means anybody can operate it without the need for a special tool such as a Loose Key, but Loose Key operation is also available for this valve if preferred.

DRAIN VALVE

221-64-04 - 3/4 MIP x Male Hose, 0.300" Ball Bore

- A compact drain valve with a 3/4" MIP inlet for those installations where a large 3/4" drain valve will not fit.
- Also available with:
 - 3/4 FIP, 3/4 Solder (Male or Female) and 7/8 OD Comp inlets.
 - Tamper-resistant screwdriver or Loose Key operation
 - Cap & chain.

DRAIN VALVE

121LB-64-04 - 3/4 MIP x Male Hose, Large Bore

- A compact drain valve with a 3/4" MIP inlet for those installations where a large 3/4" drain valve will not fit.
- Also available with:
 - 3/4 FIP, 3/4 Solder (Male or Female) and 7/8 OD Comp inlets.
 - Tamper-resistant screwdriver or Loose Key operation
 - Cap & chain.
