Water Hammer Arrestor Valve CHANGES Effective November 2009

What is changing?

- All models of Water Hammer Arrestor Valves are now being shipped with a new style of arrester
 - Arrester is longer by approx. 1/8"
 - Plated valves will now come with plated arresters
 - Brass valves will continue to have copper arresters
 - Both plated and copper arresters will now be laser marked (instead of a sticker)

Why?

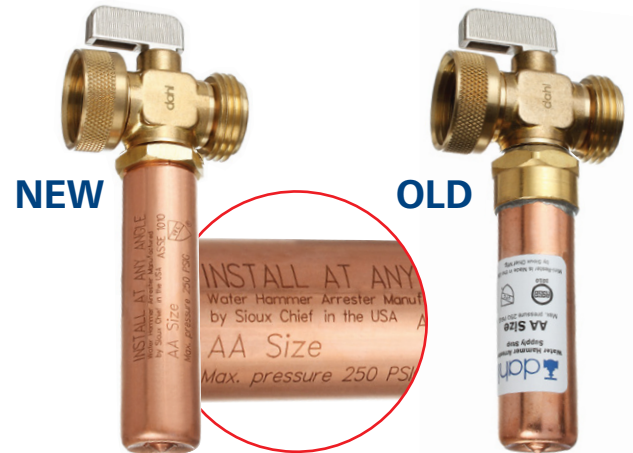

- This addresses market demand for improved appearance on plated arrester valves

What else should you know?

- The prices and box quantities are NOT changing
- There is no change to part numbers
- The arrester is still Made in the USA by Sioux Chief Manufacturing
- If your customer orders Water Hammer Arrestor Valves, the new version will be automatically shipped
- Technical Data Sheets are available upon request

When?

- Product will be shipped starting late November 2009

**Please tell your customers about these
dahl product improvements!**
