DAHL'S UNIVERSAL TEE DUAL SHUT-OFF VALVES MAKE CONNECTING SIMPLE
Customizable, Easy to Assemble Valves Work for a Wide Range of Installations

MISSISSAUGA, ONTARIO – November 2010 – Dahl recently introduced the new Universal Tee, which enables the installer to quickly assemble a common or custom dual shut-off stop using any manufacturer's 5/8 OD Comp stops. Whether the stub-out is in the floor or the wall, Dahl's Universal Tee allows the contractor to quickly & easily create a dual shut-off stop using supply stops that are typically already on the service truck– without the inventory cost of conventional dual shut-off stops.

Dahl, a family-owned manufacturer of top quality plumbing and heating valves and specialties for more than 58 years, developed the Universal Tee system to work with a wide range of piping options including PEX, Copper, CPVC, Iron and more. Dual shut-off stops are ideal for connecting items such as dishwashers, icemakers, instant hot water units and water filters to the same supply pipe used for the faucet, without the use of additional pipe fittings.

The female swivel nut on the Universal Tee allows the installer to swivel the outlet of angle stops to the most convenient position, which solves the issue of kinked connectors that many contractors face in confined spaces. In addition, as part of the company's ongoing effort to provide their customers with innovative valve solutions, Dahl also offers expansion tees that allow the installer to expand this system to three or even four outlets, all with dedicated isolation, to
