DAHL INTRODUCES NEW WATER HAMMER ARRESTER VALVES
Providing Quality Plumbing Solutions for New and Retrofit Installations

MISSISSAUGA, ONTARIO – November 2010 – Dahl, a family-owned manufacturer of top quality plumbing and heating valves and specialties for more than 58 years and Canada’s number one valve provider, recently launched a new line of Water Hammer Arrester Valves. Designed to control water hammer created by fixtures with quick closing valves, such as washing machines, dishwashers, ice machines, single lever and touchless faucets, and even toilets, the Dahl Water Hammer Arrester Valves can be used when retrofitting old or installing new supply stops.

Available in over 50 different models to suit most end-of-line pipe types and sizes, the Dahl Water Hammer Arrester Valve’s compact, integral design allows it to install upright, horizontally, or at any angle in between. Dahl utilizes an ASSE1010 AA Arrester with a dual o-ring piston that maintains a permanent cushion of air to absorb pressure spikes, setting them apart from conventional standpipes, air risers or air chambers that become waterlogged. Also, Dahl valves are manufactured in North America and made with American Brass and Teflon. In addition, as with all Dahl valves, the Water Hammer Arrester valves are all individually tested and guaranteed with Dahl’s 25 year warranty.

“The new Dahl Water Hammer Arrester Valves were developed in response to a request from one of our sales representatives, who wanted to be able to provide a comprehensive solution to his customers dealing with water hammer issues that

arise in both retrofits and new installations,” noted Gaylen Anderson, Dahl’s vice president of sales. “The new water hammer arrester valves provide our customers with an easy-to-install solution that works at an array of angles and with a wide variety of pipes and fittings.”

Installing a Water Hammer Arrester Valve protects and extends the life of appliances and fixtures from water hammer damage. Also, the valves exceed lead-free requirements based on California AB1953 and Vermont S-152 legislation.

ABOUT DAHL BROTHERS CANADA LTD.

Incorporated in 1952, Dahl Brothers is a family-owned manufacturer of top quality plumbing & heating valves and specialties for the hydronic industry. Dahl products, which meet or exceed CSA, IAPMO, and NSF requirements, are engineered as practical real-world solutions for plumbers and contractors on the jobsite. Dahl is known in the industry for using the highest quality materials, which are sourced primarily in North America. Dahl’s products are distributed through high quality Wholesalers, Original Equipment Manufacturers and Retailers throughout Canada and the U.S.A.

The Mini-Ball™ valve, All Round™ strapping, U-Clips, Piggy Back valves and dahl-in-one® are but a few examples of Dahl’s rich history of more than 50 years of product innovation. Dahl has always focused on providing excellent customer service, prompt delivery and shipping orders same or next day for regularly stocked items.
