

## Finishing Valves

dahl Part #	Description	Box/Master
611-33LE-31	5/8 OD Comp 2-1/2" Ext. x 3/8 OD Comp	8/48
611-PX3LE-31	1/2 Crimpex Ext. x 3/8 OD Comp	8/48
611-63LE-31	1/2 MIP 2-1/2" Ext. x 3/8 OD Comp	8/48

The dahl Finishing Valve is a top quality supply stop that conceals the stub-out for better finishing of pedestal sink, toilet and bidet installations. It is available for 1/2" Copper and PEX, and 3/8" & 1/2" Iron pipe rough-ins.

**Copper pipe:** The compression connection makes it easy to install on wet copper pipe; no soldering required.

**PEX pipe:** F1807 Crimp and F1960 Cold Expansion connection.

**Iron pipe:** 3/8" and 1/2" Male NPT connections for light commercial as well as applications where a drop-ear 90 was used to terminate the PEX in the wall by the fixtures.

- Available with any outlet connection for a North American supply stop application. The most common ones are 3/8" OD Compression, 1/2" OD Compression and 1/2" NPSM (in California).
- The dahl deep bell escutcheon uses high quality chrome plating to ensure a lasting, high quality, rust-proof finish.
- Fully transferable Lifetime Limited Warranty for the life of the installation.
- Meets IAPMO, CSA and ASME flow requirements.
- NSF/ANSI 372
